PROFILE

Enthusiastic and adaptable BSc Cybersecurity graduate from Bahrain Polytechnic with a 3.5 GPA, with hands-on experience in cybersecurity, SOC operations, IT infrastructure, cloud technologies, networking, and automation. A proactive problem-solver with a strong interest in emerging technologies and continuous learning, eager to apply existing skills, develop new expertise, and grow within a dynamic technology environment.

TECHNICAL SKILLS and SOFT SKILLS

- **SIEM & Detection Engineering**: Wazuh, Ossec, Custom Rules & Decoders, Alert Triage, Log Analysis, File Integrity Monitoring, Alert Tuning, MITRE ATT&CK.
- **Threat Intelligence & Incident Response**: OpenCTI, IRIS, MISP, IOC Analysis & Correlation, Incident Response, Cyber Kill Chain.
- **Automation and Development**: Python, SQL, n8n, Microsoft Power Automate, API Integration, Workflow Automation, AI / LLM integration.
- **Cloud & Infrastructure**: AWS, Microsoft Azure, Windows Server, Linux Server, Docker, Kubernetes, NGINX, Datadog, Proxmox.
- **Networking and Security Testing**: Wireshark, NMAP, Burp Suite, Metasploit, Rust Scan, BloodHound, NetExec, Gophish, MITRE CALDERA, Active Directory.
- **Soft Skills**: Problem-Solving, Analytical Thinking, Client Communication, Team Collaboration, Adaptability, Technical Documentation, Continuous Learning, Ownership & Initiative.

EDUCATION and Certifications

Education:

Bachelors in Cybersecurity | **GPA: 3.5 / 4.0** | Bahrain Polytechnic, Isa Town, Bahrain **2022 – 2026**

Certificates

- CompTIA Security+ Certificate
- AWS Cloud Security Foundation Certificate
- Microsoft PL- 400: Power Platform Developer Certificate

PROFESSIONAL EXPERIENCE

SOC Engineer Intern - NGN International | Bahrain **Feb 2026 - Aug 2026**

Technologies: Wazuh, DFIR-IRIS, OpenCTI, n8n, MITRE ATT&CK, AI-LLM, Firewalls

- Supported real client environments, delivering security implementation, troubleshooting, firewall configuration, and server deployment.
- Engineered 100+ Wazuh detection rules and decoders and automated SOC workflows using n8n, Wazuh, IRIS, and OpenCTI for threat detection, investigations, and escalations.
- Evaluated and integrated AI/LLM models into automated security workflows for alert enrichment and investigation context, supporting MITRE ATT&CK-aligned security operations.

DevOps Engineer Intern - CONFIDENCEWAY | Remote - Dubai **Jun 2025 - Sept 2025**

Technologies: AWS, Docker, Kubernetes, NGINX, Datadog

- Gained hands-on experience with AWS, Docker, and Kubernetes, deploying NGINX web servers and using Datadog dashboards for infrastructure monitoring and troubleshooting.

IT Support Technician - Nexcel Computer Solution | Bahrain **Jan 2022 – Feb 2022**

Technologies: Routers, Switches, Wi-Fi, Networked Printers

- Configured routers, switches, wireless networks, and networked printers; resolved connectivity, access, peripheral, and end-user support issues.

PROJECTS

SIEM Detection & Operations Lab – Detection Engineering | CLP Project **Feb 2026 – April 2026**

- Built a production-style monitoring environment with 100+ custom rules/decoders and dashboards in Wazuh; validated detection coverage through simulated attacks and IOC testing while tuning recurring low-value alerts.

Ransomware Protection & Penetration Testing Lab – Red Team | In-House Project **Sept 2025 – Jan 2026**

- Executed a controlled assessment across phishing, Active Directory analysis, and adversary emulation using GoPhish, NetExec, BloodHound, and MITRE CALDERA; documented ransomware risks and defensive requirements.

Machine Learning DDoS Traffic Classification – Machine Learning | AI / Automation **May 2024 – Jun 2024**

- Achieved >95% classification accuracy after preprocessing real-world network traffic, engineering features, and tuning Random Forest, SVM, and XGBoost; evaluated precision, recall, and false-positive performance.
